

Muller

December 21, 1961

Dr. Richard S. Young
National Aeronautics and Space Administration
Ames Research Center
Moffett Field, California

Dear Dick:

Dr. Muller was out here a few days ago and we had some discussion about the proposal which is embodied in the enclosed reprint. He had not heard of any other current work along these lines. It had seemed to me that either you or Dr. Gerathewohl would be able to bring him up to date on this and I would recommend it to your attention.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
